

In response to NAB's Petition 04-160, I would like to say that I do not understand why the NAB is scared of the competition that satellite radio poses to them. Instead of asking the gov't to step in and limit the type of programming and such that satellite radio can provide they need to work to improve their product which what is best for me the consumer. This countries economy is built on competition, that's why monopolies are illegal. Don't allow the NAB to become a monopoly because they have deep pockets. Please reject Petition 04-160
